Second West Nile Virus Mosquito Sample Found in Cumberland County

Carlisle, PA – Cumberland County’s Vector Control Office was today notified by the Pennsylvania Department of Environmental Protection (DEP) of the second positive mosquito sample for West Nile Virus (WNV). The positive sample was collected in North Middleton Township.

This is the second positive WNV sample in the county for 2020. To date we have collected 599 adult mosquito collection samples.

Help prevent the diseases spread by mosquitos by:

- Using mosquito repellants, wearing longs sleeved shirts and pants.
- Taking extra precautions around dusk, the peak of female mosquito feeding.
- Securing window and doors screens, so mosquitos can’t make it into your home.
- Eliminating stagnate water around your property.
- Treating water sources that cannot be drained, mosquito dunks or bits that contain *Bacillus thuringiensis israelensis* (Bti), which kills larvae. These products are safe for use around humans and pets, and can be found at hardware stores and other local retailers.

Mosquitoes transmit WNV by feeding on infected birds and transmit the disease when biting another bird, animal or human.

The county’s WNV program applies an Integrated Pest Management (IPM) Plan to control mosquitoes, while limiting the effects to people and the environment. Vector Control will continue to collect and monitor the mosquito population and to actively treat water habitat to limit future generations of mosquitoes.

The virus is not spread by person-to-person contact. One in five people infected with WNV develop a mild infection called West Nile Fever; aches, fever, skin rash and swollen lymph nodes are symptoms of this infection. With rest and fluids, most people recover in a few days. Less than one percent of infections develop into the life-threatening West Nile Encephalitis. Symptoms in severe cases include a high fever, headache, neck stiffness, muscle weakness, disorientation, tremors and convulsions. This infection requires immediate medical treatment.
